

# Aquallence

Pure Water Innovation

## NanoBlue

### Nano Blue

A unique patented Point of Entry  
water purification & disinfection system.

### A Plug & Play, self-powered, ozone based Water disinfection & purification system

- A revolutionary **patented** POE purification & disinfection system
- Purifies & disinfect the entire water system
- Microbiological & heavy metals removal
- Self-powered with no need for grid power
- Plug & Play at POE water inlet
- Alert signal capability

Roof tank installation

High-Rise building installation

# Aqualence

## NanoBlue Key Advantages

### **Disinfection Performances**

True real water "Water Shield" inactivates over 99.9999% of microbiological & metal contaminations

### **Plug & Play**

Compact, easy to install & maintain

### **Self-Powered**

No dependency on electrical power source

### **Cost-Effective**

Low operation & maintenance cost

### **Unique Patented systems**

Patent pending ozone disinfection systems for residential & HLS use

### **Internet of Things**

Alert signal capability

### **Water Quality**

Protects the entire house Chemical\_free disinfectants

### **International Standards**

Tested to Meet the NSF P231 Protocol, NSF 42, NSF 53 Standards

### **Shelf Product**

Mass production –versatile installation

### **Retrofit**

Compatibility with existing filter & softener markets and possibility of quick retrofit

### **Residual Effect**

Complete disinfection of the water tanks and the watering systems

### **Why ozone ?**

Purifies water 50 times stronger & 3,000 times faster than chlorine

Patent Pending
